

(Silicon Chip Magazine Sept '10). Improve Your Hearing Without Expensive Aids! This pocket receiver kit picks up signals from a hearing loop (or T-coil), commonly installed in commercial PA systems in places of worship, halls and function centres. You could even install your own hearing loop at home to work with your telly! Works with normal stereo headphones. Requires 9V battery (S 4971).

Important Note for Kit Buyers:

This product is supplied in component form and requires soldering, drilling, and assembly. We recommend users are familiar with at least basic electronic principles and have the ability to solder.
